General Education Program

The General Education Program at CSU Global provides undergraduate students with the necessary curriculum for state general education requirements in writing and communications, mathematics, arts and humanities, history, social and behavioral sciences, and natural and physical sciences.

The intent of general education courses is to offer students new learning opportunities and to foster untapped interests in addition to meeting state standards. Coursework offers a robust introduction to a variety of disciplines in order to accentuate the more specific coursework in each student's degree program.

Below are the offerings in each general education category. You will be assigned specific classes but can switch them with any of the below classes within each category. Please reach out to your Student Success Counselor if you wish to switch one of your general education classes.

Written Communications (6 credits)	COM300, COM303, ENG101, and ENG102
