

What is the Capstone course?

Last Modified on 07/23/2024 4:14 pm MDT

The capstone is the final course in your major and is taken after you have completed the rest of your major course requirements. The capstone covers the practical applications of what you have learned in your program. This is a summation of the knowledge you have gained throughout the rest of your courses. Generally, the capstone course consists of a portfolio project with various markers leading up to a final project. It is formatted the same as any other class.

You can find out more about your capstone in the [academic catalog](#).

When you are ready to register for your capstone, you will need to contact your [Student Success Counselor](#). They will check to ensure you have met all prerequisites before registering you.
