

# Alternatives to Microsoft Edge

Last Modified on 10/17/2018 12:35 pm MDT

## What are some alternatives to Microsoft Edge?

The Microsoft Edge internet browser is not currently supported. Most features work well, but some users have had difficulty with items such as popup blockers and discussions.

If you are having problems, we recommend using Internet Explorer, Chrome, or Firefox. Also, some users have been successful using Microsoft Edge utilizing Internet Explorer Compatibility Mode.

When we fully support Microsoft Edge, we will update the [Technology Requirements](#) on [CSUGlobal.edu](http://CSUGlobal.edu) and provide an announcement in the Student Portal.
