Supplemental Software-SPSS

Supplemental software, called SPSS Software, is used in the following Courses: CRJ330, CRJ575, MIS445 and MIS450

If your course requires the use of SPSS Software, please be sure that the software you are purchasing is brand new, as a used copy will likely not work.

If for some reason you experience issues with the SPSS Software you purchased, please reach out to SPSS/IBM directly through their technical support at the following link:

<https://www-01.ibm.com/software/analytics/spss/resources.html>

You are also able to request a free 14 day trial through IBM directly.
