Do I Need to Take My Major Courses in Order?

Generally speaking, it is recommended that you take your major courses in the order listed in your [Academic Catalog](#). Most of your major courses do build on one another which means that skipping or going out of order may lead to unfamiliarity of topics during your course.

Some majors will have prerequisite courses which must be completed before enrolling in the next class. Prerequisite courses provide the foundation and knowledge to be successful in your program.

As mentioned, the most accurate list of major courses and their recommended order can be found in your Academic Catalog. You may also visit our [website](#).
