Chinese Philosophers (AI and Plagiarism Results)

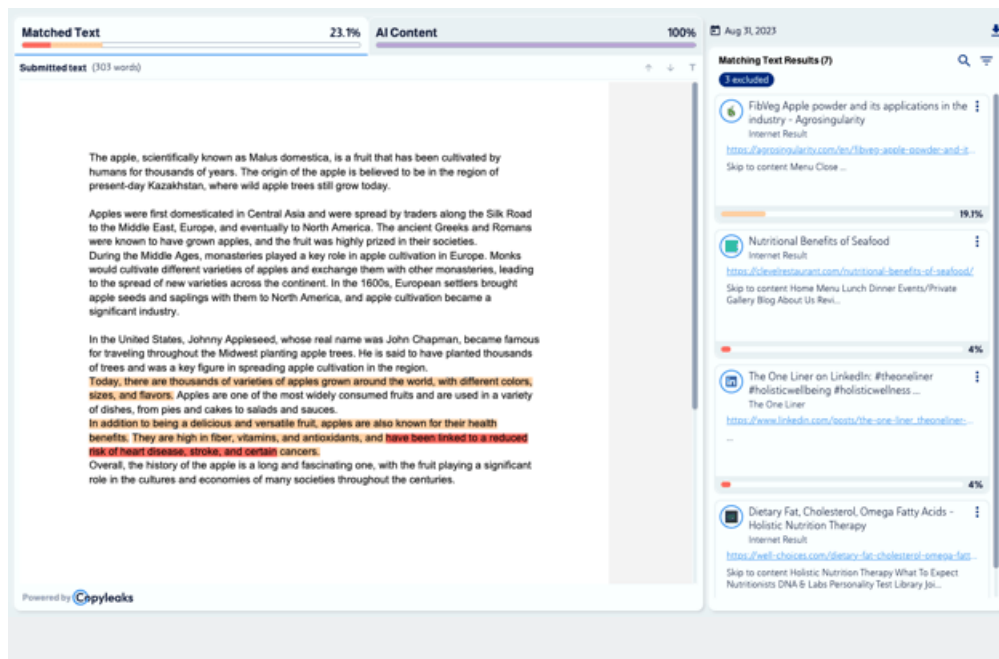

Test Student submitted Mar 19 at 9:16pm

Confucianism, Daoism (Taoism), and Buddhism generally name the three main currents of Chinese thought, although it should be obvious that like any "ism," they are abstractions—what they name are not monolithic but multifaceted traditions with fuzzy boundaries. In the case of "Daoism," it designates both a philosophical tradition and an organized religion, which in modern Chinese are identified separately as daoia and daoiaio, respectively. With their own rich histories and internal differences, the two are deeply intertwined. Laozi (or Lao-tzu, in the "Wade-Giles" system of transliteration favored by earlier generations of Western scholars) figures centrally in both. Philosophical Daoism traces its origins to Laozi, an extraordinary thinker who flourished during the sixth century B.C.E., according to Chinese sources. According to some modern scholars, however, Laozi is entirely legendary; there was never a historical Laozi. In religious Daoism, Laozi is revered as a supreme deity. The name "Laozi" is best taken to mean "Old (lao) Master (zi)," and Laozi the ancient philosopher is said to have written a short book, which has come to be called simply the Laozi, after its putative author, a common practice in early China. Laozi (also spelled Lao Tzu or Lao-tzu) was a Chinese philosopher who lived during the Warring States period (475-221 BC). He is considered one of the founders of the Taoist school of thought, and his work has been highly influential on both Chinese and Western philosophy. Laozi's philosophy is based on the concept of the Tao, or the Way, which is the underlying principle of the universe. The Tao is ineffable and cannot be fully understood, but it can be experienced through intuition and meditation. Laozi's most famous work is the Tao Te Ching, which is a collection of short poems and essays that expound on his philosophical ideas. The Tao Te Ching is one of the most important and influential works of Chinese philosophy, and it has been translated into many languages and read by people all over the world. Laozi's philosophy emphasizes the importance of living in harmony with the Tao. This means letting go of ego and personal desires, and accepting the

Submitted text (303 words)

The apple, scientifically known as *Malus domestica*, is a fruit that has been cultivated by humans for thousands of years. The origin of the apple is believed to be in the region of present-day Kazakhstan, where wild apple trees still grow today.

Apples were first domesticated in Central Asia and were spread by traders along the Silk Road to the Middle East, Europe, and eventually to North America. The ancient Greeks and Romans were known to have grown apples, and the fruit was highly prized in their societies.

During the Middle Ages, monasteries played a key role in apple cultivation in Europe. Monks would cultivate different varieties of apples and exchange them with other monasteries, leading to the spread of new varieties across the continent. In the 1600s, European settlers brought apple seeds and saplings with them to North America, and apple cultivation became a significant industry.

In the United States, Johnny Appleseed, whose real name was John Chapman, became famous for traveling throughout the Midwest planting apple trees. He is said to have planted thousands of trees and was a key figure in spreading apple cultivation in the region.

Today, there are thousands of varieties of apples grown around the world, with different colors, sizes, and flavors. Apples are one of the most widely consumed fruits and are used in a variety of dishes, from pies and cakes to salads and sauces.

In addition to being a delicious and versatile fruit, apples are also known for their health benefits. They are high in fiber, vitamins, and antioxidants, and have been linked to a reduced risk of heart disease, stroke, and certain cancers.

Overall, the history of the apple is a long and fascinating one, with the fruit playing a significant role in the cultures and economies of many societies throughout the centuries.

You should review your similarity score and ensure it is in an acceptable range before submitting for grading.

When you are ready to submit your assignment for grading remove DRAFT from the file title change it to FINAL. Submit the assignment again. This will let your instructor know you are ready to have your assignment graded.
