

Microsoft Office for Students

Last Modified on 01/25/2024 12:28 pm MST

As a CSU Global student you will have access to a suite of Microsoft Office products. You can find steps on how to set up the free online versions, by clicking on this link: [Office_365_Education.docx.pdf](#) 

If you're not an experienced user of these products, you can find help in a few different areas.

In your Student Portal, click the Online Tutoring link, navigate to Tutoring, and then click on Computers and Technology. From here you can select the Microsoft Office product you need tutoring in and schedule a future session or do a drop-in session.

You can also find online tutorials through LinkedIn Learning in the CSU Global Library. Click on the Library link from your Student Portal and search LinkedIn Learning in all databases A-Z. Once you're on the LinkedIn Learning page you can type the name of the Microsoft Office product you want to learn more about such as Excel or PowerPoint and find several beginner to advanced videos on the various suite of products available to you.
